SRAC STRATEGY ON SUSTAINABILITY and RESILIENCE

CODE: SRAC-P-72A

Ed. 1

Rev. 0

1. Introduction and Context

SRAC recognizes the critical importance of sustainability and resilience in today's context of climate change, limited resources and increasing stakeholder demands. This strategy is intended to guide the organization in implementing sustainable practices and enhance its ability to be resilient and adapt to future challenges.

2. Vision

Maintain our leadership position in the field of certification, verification and validation and by promoting sustainability and resilience in the field of management system certification, product conformity and other services in our scope of work by adopting best practices and aligning to the highest international standards.

3. Mission

To promote a positive impact on the environment, society and the economy by certifying and promoting management systems that support sustainable development, and by following up in product certification, verification and validation the application of sustainability requirements.

4. Strategic Objectives

1) Integrity and Compliance

- Ensure compliance with international sustainability legislation and regulations (including CSRD and ESRS).
- Maintain a high level of integrity in all certification, verification and validation processes promoting transparency and ethics.

2) Environmental Impact

- Reduce the carbon footprint of the organization by implementing appropriate measures.
- Promote certification, verification and validation services that encourage sustainability practices among our clients.
- Maintain and improve our internal waste management and recycling program.

3) Human Resources and Organizational Culture

- Developing an organizational culture centered on sustainability and resilience through continuous employee training and active involvement in sustainable initiatives.
- Promote diversity and inclusion within the organization, ensuring a fair and safe work environment.

4) Innovation and Technology Development

- Invest in technologies that support sustainable certification, verification and validation processes, such as digital solutions that reduce paper and resource consumption.
- Develop and adopt innovative certification, verification and validation criteria that reflect new global sustainability challenges.

5) Stakeholder Relations

SRAC STRATEGY ON SUSTAINABILITY and RESILIENCE

CODE: SRAC-P-72A

Ed. 1

Rev. 0

- Actively involve stakeholders (customers, partners, authorities) in the development and implementation of sustainable initiatives.
- Promote sustainable practices in the supply chain and in relations with suppliers.

6) Monitoring and Reporting

- Implement a robust sustainability performance monitoring and reporting system in line with applicable ESRS standards.
- Publish regular sustainability reports highlighting progress and providing full transparency to stakeholders.

5. Tactical Actions

- **Impact Assessment:** Conduct a sustainability assessment to evaluate the current impact of the organization on the environment, society and the economy, thereby identifying areas for improvement.
- **Develop new certification, verification and validation services:** Create certification, verification and validation services that include stringent sustainability criteria, addressing emerging market and international regulatory needs.
- **Awareness campaigns:** Organize internal and external campaigns to educate and inform about the importance of sustainability and to promote the adoption of sustainable practices.
- **Strategic alliances:** Establish strategic partnerships with organizations, academic institutions and other entities that promote sustainability and resilience.
- **Calculating the organization's carbon footprint and reducing greenhouse gas emissions:** Calculating the organization's carbon footprint. Develop and implement a concrete plan to reduce the organization's carbon footprint with clear and measurable targets.

6. Key Performance Indicators

- Increased number of certifications in sustainability field
- Number of employees completing sustainability training programs.
- Stakeholder satisfaction with transparency and reporting.
- Reduction of GHG emissions

7. Monitoring and Analysis

- Monitor progress of strategy implementation by internal audits.
- Annual review of the strategy in light of technological developments, regulations and feedback received from stakeholders.

8. Conclusion

This strategy reflects our firm commitment to contribute to a more sustainable and resilient world by integrating sustainability practices into all aspects of our certification, verification and validation activities.

By implementing this strategy, we aim to become a model of sustainability excellence in the certification, verification and validation industry.
